Applications

RESIDENTIAL

Functionalities

DEMARCATION   DESIGN

Panels

The Zenturo Classic panel is a flat panel, with a combination of 3 different mesh sizes : 100 x 100, 100 x 50 and 50 x 50 mm. The double, alternating horizontal wires offer good rigidity.

The panels have a width of 2005 mm and are available in a range of heights from 655 till 2005 mm. Wire diameter of the horizontal wires: 5.00 mm, wire diameter of the vertical wires: 4.15 mm.

Posts and fixation

Bekaclip posts

Zenturo Classic panels can be installed with metal posts type Bekaclip (as used for Bekafor Classic panels). The panels can easily be fixed to the posts using standard Bekafor accessories.

Gates

The Zenturo Classic panel fence matches perfectly with the Zenturo Classic swing gates assortment.

Coating technique

The panels are made of galvanised wire, and an adhesion layer is provided for perfect adhesion with the polyester top coating (min. 100 micron).

The posts are internally and externally galvanised (min. layer thickness 275g/m², both sides combined) according to Euro standard EN 10346, after which an adhesion layer is applied and polyester plastic coated (min. 60 micron).

Colours

Metallic Anthracite BF7016M. Other colours on request.

Infills

The Zenturo Classic panel can be filled with 3 different, unique & decorative 'infills'. Note: use adapted postdiameters when filling the panels completely with strips.

Pixels

Square and rectangular plastic elements perfectly fit into the panel's different mesh sizes: 100x100, 100x50 and 50x50 mm. The pixels are easily clicked on the panel and can be used to form different patterns on the fence... Available in anthracite.

Flexo Strip

Flexible plastic strip is available in 2 widths (44 mm for mesh width 50 mm, 94 mm for mesh with 100 mm). They can be woven through the panel's meshes, both in vertical and horizontal direction. Available on rolls of 50 m (to be cut to length), in anthracite.
